

Further information about necessary modes of behaviour, which absolutely ought to be heeded

Excerpt from the 740th contact, Saturday, 23rd of May, 2020

Ptaah Greetings to you too, Eduard, dear friend. It is indeed the case, however, that I still have a few things to explain to you concerning this matter with regard to the safety measures that ought to be observed under all circumstances. And these explanations are needed due to the emergency, and you are to publish them on your website so that they are disclosed:

- 1) The irresponsibility of the state leaders has resulted in the coronavirus being able to spread as a pandemic, because from the very beginning the responsible ones of the states did not take the necessary urgent and unavoidable security measures to contain the rampantly spreading disease, as you, on the contrary, have done in the Center and continue to do. In the absence of this fact, that is to say, due to the failure of the state leaders, the coronavirus is spreading rampantly everywhere and will have caused some 500,000 deaths by the end of June. Above all, due to the fault of the dictators of the USA and Brazil, Trump and Bolsonaro – who have fallen pathologically into megalomania, hubris and imperiousness and double bean-straw-like low intelligence – these countries will have to mourn the largest number of infected and dead ones by the end of June. But this also extends to other countries, especially to various South American countries; therefore the whole matter of the expanding rampantly spreading disease will continue to persist. This will also affect all those states that senselessly and irresponsibly relax or completely abolish the few security measures that have been enacted, such as bans on going out and traveling, and the safe distance decrees as well as the wearing of protective masks and so forth, or even allowing demonstrations. This will lead to many new infections and fatalities, namely also in countries which, in this regard, only had to mourn few deaths so far.

- 2) The rampantly spreading corona disease has not yet been brought under control in any form and will continue to claim many victims, namely both direct victims, who die quickly as a result of infection, as well as indirect victims, who die afterwards from sequelae of the rampantly spreading disease, which will be many and varied; for example, persistent lung diseases, which, among other things, can manifest themselves as pulmonary fibrosis caused by the virus, and as respiratory distress. This is the case because the rampantly spreading disease also causes a lack of oxygen in the blood, which leads to the corona virus having the effect of calling forth a remodelling of the lung structure and the lung connective tissue expanding abnormally. Therefore both external and internal damage occurs, that is to say, interstitial processes of the lung tissue, which means that, in the space between the actual function-bearing interstitial connective tissue, that is to say, in the niches between the body cells, tissue fluids form, for example, through which this lung disease is called forth. This inevitably results in inadequate regeneration of the covering cells in the pulmonary alveoli, and this in turn disrupts the repair of the lung mechanisms and additionally also scars and hardens the supporting tissue of the lungs.
This disease, however, is only one of various others, some of which arise as severe sequelae that remain efficacious throughout life and over time can lead to infirmity and death and can call forth new types of suffering.

- 3) The whole thing of the irrationality, irresponsibility and all the human-life-disdaining and much too premature relaxing and lifting of the halfway effective measures against further spreading, infection and claiming of deaths by the rampantly spreading corona disease, will claim many more victims in the near and following time. Many of those holding positions of responsibility of the majority of all state officials are corrupt, are doubly as low in intelligence as bean straw, irresponsible or just simple-minded and incapable of holding office.

- 4) As a result of all the above-mentioned, it is still absolutely essential – namely in the longer term, which under some circumstances can extend into the next year and the year after that – that everything conceivably necessary in terms of safety measures is maintained, namely, in particular, the wearing of protective masks of the FFP2 type, although in special cases under some circumstances an FFP1 protective mask can suffice. It is also absolutely essential to keep a necessary distance of 1.5 to 2 metres when dealing with fellow human beings who are not directly involved in one's own household, family area or communal area as pertains to observing the required personal, family-related or communal safety measures. And all of these security

measures are also to be extended to both close and more distant family members, friends and close acquaintances.

- 5) No attention ought to be paid to liars regarding the rampantly spreading corona disease and all sorts of conspiracy theories and persons from the populations who are doubly as low in intelligence as bean straw and who demonstrate against, deny or ridicule security measures regarding the rampantly spreading corona disease and consequently they go around carelessly, simple-mindedly and irresponsibly without protective masks and, moreover, move towards other persons at an insufficient distance or even touch them in any form, which is criminally careless, consciencelessly indifferent, reckless and unscrupulous.

These, Eduard, are the facts and requirements which I should have still presented to you last night, but which I forgot.
